

# SMPTE STANDARD

## D-Cinema Packaging — Asset Mapping and File Segmentation — Amendment 1

---

### Background

Since publication of SMPTE 429-9-2007, "D-Cinema Packaging – Asset Mapping and File Segmentation", one issue has been identified:

In Annex A, Section A.1, the "file" URI scheme is used without a normative definition.

Amendment of the specification will encourage correct, interoperable implementation.

### Amendment

Upon approval of this amendment, SMPTE 429-9 shall be revised according to the following:

The reference to RFC 3986 shall be moved from the Bibliography (Annex C) to the Normative References (Section 3).

The normative text in Section A.1, sentence 1 (page 14), which currently reads:

*The URL scheme to be used for AssetMap Path element values shall be "file".*

shall be replaced in its entirety by:

*The URL scheme to be used for AssetMap Path element values shall be "file" [RFC 3986].*
